

Extend data to your global trading community

Managed File Transfer Services

Gain a seamless flow of information to exchange critical data and payments throughout your global digital trading community—for you, your suppliers, and customers.

Insights

- Leverage and rapidly deploy a cost-effective global communications solution.
- Improve efficiencies throughout your trading community.
- Accelerate the processing of fund transfers, invoices, and more.
- Integrate seamlessly with most network, transmission, and security protocols.

Get what you need

It's essential to have your global trading partners communicate as one. To do it, you need a file transfer solution that accelerates processing, improves efficiencies, and gives your trading partners the supreme flexibility to exchange data electronically in any format through virtually any communications, network, or platform protocol.

Look no further. DXC Managed File Transfer Services gives you leading edge security, 24x7x365 support, and dramatic cost savings, which adds greater value. The upshot: DXC Managed File Transfer Services is a powerful way for you to achieve business success.

Gain global network capability

Whether bound for sites around the block or halfway around the world, DXC Managed File Transfer Services is available globally from all of our state-of-the-art data centers to securely handle your data files.

Increase your flexibility

This service supports unlimited data formats and a variety of communications protocols and platforms. In addition, files can be sent to mailboxes or routed to other networks.

Benefit from our knowledge

Gain from experienced DXC Managed

File Transfer Services to help desk professionals who are available 24x7 to resolve problems and answer questions. Systems engineers and developers are available during normal business hours for additional support.

Reduce your EDI costs

Pay only for the actual file volume transmitted, a flat per-file charge. With DXC Managed File Transfer Services, there are no hidden, hard-to-understand fees of any kind. Discounted rates are available for high-volume transmissions. And our rates are lower than those of most other value-added networks (VANs).

Enter a safe, secure environment

Any user connecting to DXC Managed File Transfer Services must present valid authentication credentials. Transmitted files are kept safe using strong, state-of-the-art encryption algorithms. In addition, only secure connections are allowed into the DXC Managed File Transfer Services network.

Review high-level features

- All commonly used connection types, protocols, and networks supported
- Trading partner onboarding; communicates with more than 65,000 network endpoints
- "Production hardened" over 25+ years
